

## The World Turned Upside Down – Bridgwater College Art Students

This collection has been created by the level 2 diploma in Art students from Bridgwater and Taunton college (Bridgwater campus). Students have responded to the brief of ‘Microscopic worlds’ where they have examined cellular structures of natural world items – such as Sunflowers and dicot roots. They have explored producing a range of outcomes in the medium of print. Using Collagraph, Dry point etching techniques – some of which have been embellished with colour and embroidery. Each piece captures the form and flow of the very makeup of our own world.

For further details on any of the pieces, please feel free to contact the course leader of level 2 art – Vicky Knowles, [knowlesv@btc.ac.uk](mailto:knowlesv@btc.ac.uk)
